FOREWORD

Landing bulletins provide basic catch records of amounts and values of various marine resources taken by California's commercial fisheries while summarizing catches of the partyboat sportfishing industry. Small quantities of freshwater fish taken commercially in inland areas are also detailed. These figures are of local, national, and international significance to fishery scientists and others interested in the wise utilization and management of California's living marine resources.

This report for 1973 is the 33rd in a series stemming from the first gathering of commercial fisheries landing data by the California Department of Fish and Game in 1916 and the subsequent first publication of these catch data in 1929 for the years 1926 and 1927.

California's fishery statistics are based on a system where fish dealers, processors, and operators of sportfishing partyboats send duplicate copies of their landing records to the department. Fish Bulletin 86, which reported the catch for 1950, describes fully the system and methods used in collecting commercial fish records. Basic principles remain the same today as then, although methods and equipment have been changed as necessary. The partyboat fishing system is described in Fish Bulletin 145 by Parke Young (1969).

Credit for this publication is due largely to the cooperative efforts of the fishing industry, wholesale fish dealers, fishermen, canners, and processors, and department personnel responsible for the market receipt system who have through their efforts provided the most accurate statistics possible. My utmost appreciation is extended to this large group of people without which this publication would not be possible.

1. EXPLANATION OF TABLES

Tables in this bulletin summarize statistics of the various fishery operations in California during 1973. Five types of activity are being reported this year: landings of commercial fishermen in California; sport catches of the partyboat fleet; imports of tuna from other states or foreign countries destined for processing in California; landings of inshore species used for bait; and catches of boats supplying live bait for sportfishing. In addition, the species composition of the 1973 ocean salmon landings is reported.

Statistics presented in this publication do not encompass all fishing activities in California since not all of these functions are reported. For example, sportfishing from private boats or from shore is not reported, nor is the quantity of fish imported for use in a fresh state compiled.

Preliminary landing data are published annually in the circular series which enumerates certain fishery products produced from the catch. The 1973 figures are contained in Circular number 48, "Statistical Report of Fresh, Canned, Cured and Manufactured Fishery Products for 1973" (Oliphant, 1973).

In years to come, the tables will be printed in metric values; however, for this bulletin the following necessary factors for conversion are provided.

1 Pound — 453.59 Grams

1 Pound — 0.453 Kilogram

1 Ton (Net or Short) = 0.907 Metric Ton

1.1. SOURCE OF DATA

Data concerning each commercial landing, inshore bait delivery, and import are recorded on receipts by fish dealers or processors at the time of delivery. Copies of these documents are transmitted to the department twice each month. For each transaction the dealer is required to provide the species, weight, and price paid to the fishermen. The date of the transaction, the fisherman's name, the fishing boat registration number, and intended use of the fish (canning, fresh, etc.) also are required. In addition, type of gear used and the specific area where the fish were caught are reported.

Partyboat catch data are obtained from logs completed by the boat operator. The log for each trip indicates the number of each species taken, number of anglers, number of hours fished, and the specific area fished. The date, boat name, and boat registration number also are furnished. Copies of these records are sent to the department monthly.

Operators of boats supplying live bait keep a voluntary daily log showing number of sets, species caught, area fished, and number of scoops of bait sold. Copies of these logs are furnished the department monthly. While these records represent most live bait landings, the reported catch should be regarded as minimal.

Clerical personnel at field offices in Eureka, Menlo Park, Long Beach, and San Diego maintain contact with fish dealers, local Fish and Game wardens, and field biologists to insure that the records are accurate and transmitted promptly. All data received by the department are carefully edited for completeness and coded to facilitate processing.

The information is then punched into cards and summarized with electric tabulating machines.

1.2. STATISTICAL AREAS

California is divided into seven areas for the purpose of reporting fisheries statistics (Figure 1). Each statistical area is named for a major port within its boundaries.

Sacramento area landings prior to 1972 were included with San Francisco totals. In the 1972 bulletin, the separation of all inland fish landings resulted in Appendix I and II. The status of these data is continued in its past form until future demand may require their elevation to table status.

1.3. SPECIES

The common and scientific names of species reported here are those designated by the department (Gates and Frey, 1974). Some species are reported only collectively when, for economic or other reasons, their separation is not practical (Table 1).

The "Miscellaneous (Animal Food)" category consists of a variety of low value species caught by trawling. Since it is impractical for dealers to report the many species separately, department biologists periodically sample this catch to determine its species composition. Based on this sampling, the percentage and weight compositions of 1973 animal food landings are as follows:

<i>Species</i>	<i>Percent</i>	<i>Pounds</i>
Pacific hake	47.5	153,226
Rockfish (12 species)	18.2	58,710
Sablefish	16.7	53,871
Dover sole	7.2	23,226
English sole	5.7	18,387
Rex sole	3.8	12,258
10 other species	0.9	2,903
	100.0	322,581

Salmon landings reported in the tables are for all species combined. However, biologists from the department's Anadromous Fisheries Branch sample the commercial and sport salmon fisheries to determine species composition of catches and to obtain estimates of the unreported skiff catch. The sampling methods and results for 1952 through 1965 were detailed by Jensen and Swartzell (1967); since 1966, results have been presented annually in the landing bulletins.

The miscellaneous fish category, as reported in the 1973 landings tables, consists of small volume deliveries of the following species: lamprey, California moray, striped mullet, Pacific halibut, sargo, shad, spotted cabrilla, and wolf-eel. Reporting of skate and ray species on market receipts was poor; the reported species consisted of skates, rays, stingrays, and shovel-nose guitarfish. Miscellaneous mollusks consisted of mussels, quahogs, sea snails, soft shell clams, and Washington clams.

Due to increasing requests for marine plant harvest information, a table of kelp landings is presented in Appendix III. This is an updated version of the table presented by Frey (1971) on giant kelp, *Macrocystis* spp., landings by open and leased beds dating back to 1916.

1.4. CONDITION

Most fish and shellfish are landed in a round condition; however, some species, such as barracuda, salmon, and swordfish usually are

eviscerated or cleaned before being brought ashore. The condition of fish landed or shipped into the state cannot always be determined, so the tables represent summarized weights as reported to the department without regard to condition.

Since 1963, oyster landings have been reported as packed weight rather than weight in the shell. Packed weight is estimated to be 15.5% of the live weight for Pacific oysters and 10.9% for eastern oysters.

Landings reported in measurements other than weight are equated to pounds using conversion factors determined by periodic sampling.

Abalone number to weight conversion factors were reexamined during the 1970-71 abalone season by a department biological team. These conversion factors, rounded off to whole numbers, were used in 1972. The same factors are used in this bulletin and are as follows:

Abalone, red	45 pounds per dozen
Abalone, pink	25 pounds per dozen
Abalone, green	25 pounds per dozen
Abalone, white	20 pounds per dozen
Clam, Washington	7 pounds per dozen
Crab, Dungeness	2 pounds each
Live bait	12.5 pound per scoop

1.5. VALUE

Value is computed from prices paid to fishermen. Area value figures are ascertained by summing the value of all individual landings in that area. The value for an individual port within an area is calculated from weights of each species landed at that port and the average price paid for the species in that area. When the price paid for an individual landing is not specified, the average price paid for the species in the area is used.

1.6. INSHORE BAIT

The inshore bait fishery takes numerous species of fish and invertebrates from bays, rivers, and intertidal regions. Records of this fishery have been published as a separate summary in landing bulletins since 1963. Conversion factors used for inshore bait for 1973 were as follows:

Crab, sand	0.041 pound per dozen
	4.5 pounds per gallon
Crab, shore	0.013 pound per dozen
Mudsucker	0.465 pound per dozen
Mussel	80.000 pounds per sack
Sculpin, staghorn	0.465 pound per dozen
Shrimp, ghost	0.128 pound per dozen

Common and Scientific Names of Fishes, Crustaceans, and Mollusks in the
1973 Catch

Common name	Scientific name	Common name	Scientific name
FISHES			
Anchovy, Northern	<i>Engraulis mordax</i>	Salmon	<i>Oncorhynchus tshawytscha</i>
Barracuda, California	<i>Sphyraena argentea</i>	King	<i>Oncorhynchus gorbuscha</i>
Bass, rock	<i>Paralabrax clathratus</i>	Pink	<i>Oncorhynchus kisutch</i>
Kelp bass	<i>Paralabrax nebulosus</i>	Sanddab	<i>Citharichthys sordidus</i>
Sand bass, barred	<i>Paralabrax maculatus/fasciatus</i>	Sardine, Pacific	<i>Sardinops sagax caeruleus</i>
Spotted sand bass	<i>Paralabrax maculatus/fasciatus</i>	Sargo	<i>Anisotremus darwini</i>
Blacksmith	<i>Chromis punctipinnis</i>	Sculpin	<i>Scorpaena guttata</i>
Bonito, Pacific	<i>Sarda chilensis</i>	Sechin, Pacific staghorn	<i>Neosebastes americanus</i>
Caballa	<i>Scorpaenichthys marmoratus</i>	Sea bass, giant	<i>Stereolepis gigas</i>
Cabealla, spotted	<i>Epinephelus analogus</i>	Seabass, white	<i>Cynoglossus nobilis</i>
Croaker		Senorita	<i>Oxyjulis californica</i>
White	<i>Gymnophorus lineatus</i>	Shark	
Queenfish	<i>Seriurus politus</i>	Members of family Alopidae, Carcharhinidae, Lamnidae and Squalidae	
Dolphinfish	<i>Coryphaena hippurus</i>	Sheephead, California	<i>Pimelometopon pudicum</i>
Eel, wolf	<i>Anarrhichthys ocellatus</i>	Skates and Rays	
Flounder		Members of family Rhinobatidae, Rajidae and Myliobatidae	
Arrowtooth	<i>Atheresthes stomias</i>	Smelt	
Starry	<i>Platichthys stellatus</i>	Jacks/melt	<i>Atherinopsis californiensis</i>
Flyingfish	<i>Cypselurus spp.</i>	Night	<i>Spirinchus starksii</i>
Freshwater fish		Surf	<i>Hypomesus pretiosus</i>
Carp	<i>Cyprinus carpio</i>	Whitebait	<i>Allosmerus elongatus</i>
Sacramento blackfish	<i>Orthodus microlepidotus</i>	Sole	<i>Spirinchus starksii</i>
Green, kelp	<i>Hexagrammos decagrammus</i>	Butter	<i>Isopeplla solepis</i>
Grenadiers		Dover	<i>Microstomus pacificus</i>
California	<i>Nesumia stegolepis</i>	English	<i>Paraprophryx retulus</i>
Pacific	<i>Coryphaenoides acrolepis</i>	Petrale	<i>Eopsetta jordani</i>
Hake, Pacific	<i>Merluccius productus</i>	Rex	<i>Glyptocephalus zachirus</i>
Halfmoon	<i>Medialuna californiensis</i>	Rock	<i>Lepidotretta bilineata</i>
Hallibut		Sand	<i>Psettichthys melanostictus</i>
California	<i>Paralichthys californicus</i>	Swordfish	<i>Xiphias gladius</i>
Pacific	<i>Hippoglossus stenolepis</i>	Tuna	
Herring, Pacific	<i>Clupea harengus pallasi</i>	Albacore	<i>Thunnus alalunga</i>
Lamprey	<i>Lampetra spp.</i>	Bigeye	<i>Thunnus obesus</i>
Lingcod	<i>Ophiodon elongatus</i>	Bluefin	<i>Thunnus thynnus</i>
Mackerel		Skipjack, tuna	<i>Euthynnus pelamis</i>
Jack	<i>Trachurus symmetricus</i>	Skipjack, black	<i>Euthynnus lineatus</i>
Pacific	<i>Scomber japonicus</i>	Yellowfin	<i>Thunnus albacares</i>
Market, California	<i>Trachurus mordax</i>	Turbot	
Muliecker, longjaw	<i>Gillichthys mirabilis</i>	Curfin	<i>Pleuronichthys decurrens</i>
Mullet, striped	<i>Mugil cephalus</i>	Diamond	<i>Hypospatha guttulata</i>
Opahye	<i>Girela nigricans</i>	Hornhead	<i>Pleuronichthys verticalis</i>
Perch, ocean	Members of family Embiotocidae	Wahoo	<i>Acanthocybium solanderi</i>
Pompano (Butterfish,		Whitefish, ocean	<i>Cynoscion princeps</i>
Pacific)	<i>Pampus similis</i>	Yellowtail	<i>Seriola dorsalis</i>
Rockfish	Members of family Scorpaenidae		
Sablefish	<i>Anoplopoma fimbria</i>		
AMPHIBIA			
Bullfrog	<i>Rana catesbeiana</i>		
CRUSTACEANS			
Crab		Prawn	
Dungeness	<i>Cancer magister</i>	Ridgeback	<i>Eusicyonia ingentus</i>
Pelagic red	<i>Pleuroncodes planipes</i>	Spot	<i>Pandalus platyceros</i>
Rock	<i>Cancer spp.</i>	Shrimp	
Sand	<i>Emerita analoga</i>	Bay	<i>Crago spp.</i>
Sheep	<i>Loxorhynchus spp.</i>	Ghost, Bay	<i>Callianassa californiensis</i>
Shore	<i>Hemigrapsus spp.</i>	Ocean, Pacific	<i>Pandalus jordani</i>
Crayfish	<i>Astacus traversi</i>	Red	<i>Hippolytima californica</i>
Lobster, spiny	<i>Panulirus interruptus</i>		
ECHINODERMS			
Sea urchin	<i>Strongylocentrotus spp.</i>		
MOLLUSKS			
Ahalone		Quahog, Northern	<i>Mercenaria mercenaria</i>
Black	<i>Haliothis cracherodii</i>	Softshell	<i>Mya arenaria</i>
Green	<i>Haliothis fulgens</i>	Washington, common	<i>Sazidomus nuttalli</i>
Pink	<i>Haliothis corrugata</i>	Mussel	
Red	<i>Haliothis rufescens</i>	Bay	<i>Mytilus edulis</i>
Threaded	<i>Haliothis assimilis</i>	Rock	<i>Mytilus californianus</i>
White	<i>Haliothis sorenseni</i>	Octopi	<i>Polypus spp.</i>
Clam		Oyster	
Freshwater	<i>Corbicula fluminea</i>	Eastern	<i>Crassostrea virginica</i>
Jackknife, California	<i>Tagelus californianus</i>	Giant Pacific	<i>Crassostrea gigas</i>
Littleneck	<i>Protobranchia staminea</i>	Snail, sea	<i>Liparis atlanticus</i>
Purple	<i>Sanguinolaria nuttalli</i>	Squid, market	<i>Loligo opalescens</i>

Number of Vessels†-----	10	11	14	12	11

* Weights are estimated from voluntary records. They should be regarded as minimal because some fishermen do not supply catch information.

T Less than 500 pounds.

† Consists primarily of queenfish and white croaker.

‡ The number of live bait fishing vessels reported here should be considered minimal because some fishing operations utilize more than one vessel simultaneously or alternately, while others do not volunteer catch information at all.
